

The Terrain of COVID-19 Vaccinations

Preamble

This COVID-19 Vaccination Survey is a matter intentionally separated from all other types of Vaccinations. While Diphtheria, Pertisus, and Typhoid (DPT); Measels, Mumps, and Rubella (MMR); tetanus; polio; Hepatitis A and B; and many more diseases have proven to compromise childhood health, or even result in death, COVID 19 has not yet proven to endanger childhood health to the degree these and other diseases have. Therefore, as COVID-19 is a disease unlike any other, it necessitates its own, separate, and distinct school policy, not to be cast into existing vaccination policies. Thank you for sharing your prespectives about COVID-19 as the leadership of the school begins to draft and adopt a coherent policy about COVID-19 vaccinations

I am resonding to this survey as *

- a parent
- an employee

Powered by  formsite

Given the impending availability of a COVID-19 vaccination, as a parent (please mark all that apply): *

- I would be vaccinated for C-19 ASAP
- I would not be vaccinated for C-19
- I would vaccinate my child (ren) for C-19 ASAP
- I would not vaccinate my children for C-19
- I am still very uncertain about C-19 vaccinations, and thus undecided

The school's COVID-19 vaccination policy *

- will determine whether or not my child(ren) will continue to attend classes on campus
- will justify why my child(ren) will continue to attend in classrooms, assuming the policy is reasonably grounded in medical science
- has little or no bearing on my decision to continue my chid(ren)'s education online
- I am uncertain about this

Given the impending availability of a COVID-19 vaccination, as an employee: *

- I would be vaccinated for C-19 ASAP
- I WOULD NOT choose to be vaccinated for C-19
- I am uncertain at this time

Concerning C-19 vaccinations, this is what I expect of the school (mark all that apply): *

- Only vaccinated adults and children will be allowed on campus. In other words, I expect a vaccination to be required of all regardless of age.
- All employees are to be vaccinated. Students would not be required to be vaccinated for C-19.
- All adult volunteers and guests on campus must be vaccinated.
- Leave this matter to the discretion of employees, volunteers/guests, and families
- I am very uncertain about this at this time
- Specifically, this is what I expect

What specific concerns do you have that this survey did not cover?

Your specific concerns are important to us!
