

Illness Policy

If a child is sick, parents/guardians are asked to protect their child as well as other children by keeping their child home. Children with any of the following symptoms should not come to school:

- Temperature of 99.6.0 or above without the aid of over-the-counter medications
- Diarrhea
- Vomiting
- Undiagnosed rash
- Contagious condition: head lice, pink eye, ring worm, influenza, persistent cough, chicken pox, etc.
- Any symptoms that might prevent him/her from participating fully in classroom routines and activities
- Any symptoms that might require more individual care than is possible in a group setting

Children are not to return to school until they are symptom-free, fever-free for a full 24 hours without the aid of over-the-counter medications. Children may return earlier if they have a doctor's note stating the condition is not contagious.

If a child becomes ill at school, the parents/guardians will be notified to come and pick him/her up. Sick children will be supervised, but will be isolated from classmates to avoid exposure to others.

All families will be notified if any communicable disease occurs among the children.
